

FMB Bitesize Business Forum

Financial Management Bureau understands business, after all we are in business ourselves. From a desk in a front room we have seen our enterprise grow to the staff of thirty we are today. This didn't happen overnight, or without a lot of hard work. A pinch of the entrepreneurial spirit in addition to the time and graft and you're nearly there. The fourth ingredient is planning and that's where we can help.

You regularly take time to map out where your business is going and know this pays dividends. It stands to reason you should do the same with your business's financial affairs. You may use a Financial Planner already in a personal context, but have you considered how beneficial an Independent Financial Planner can be for you business?

FMB are holding a **Bitesize Business Forum** with topics that should inform your planning in the near future and the longer term.

Pick and choose the topics relevant to you, stay for one, two sessions or the whole day. We know you are busy people and we want you to have easy access to the best business advice you can get.

Tuesday 23rd February 2010 – Castle Green Hotel Kendal
